Chief AI Officer (CAIO)

About Gainr Protocol

Gainr is building the world's first AI-powered decentralized sports betting and prediction markets ecosystem on Solana. Our mission: to redefine iGaming through deep AI integration, regulatory compliance, and transparent, riskless betting infrastructure. Backed by partnerships with the University of Glasgow and leading blockchain innovators, Gainr is positioned at the intersection of AI, DeFi, and iGaming—a multi-billion-dollar opportunity.

Why This Role Matters

AI isn't an add-on at Gainr—it's the backbone of our ecosystem. From behavioral modeling and predictive analytics to portfolio optimization and real-time odds engines, AI drives every user experience and operational decision. As CAIO, you'll architect and scale the intelligence layer that powers our entire protocol.

Your Mission

- **Lead AI Strategy:** Define and execute Gainr's AI roadmap across betting engines, liquidity optimization, and user personalization.
- **Build & Scale:** Oversee development of advanced ML models for predictive analytics, generative insights, and automated market-making.
- **Collaborate:** Work with blockchain engineers, tokenomics experts, and compliance teams to ensure AI aligns with regulatory and technical frameworks.
- **Innovate:** Drive research partnerships with academic institutions and contribute to Gainr's position as a thought leader in AI-driven Web3.

What We Are Looking For

- Proven leadership in AI/ML (10+ years), ideally with experience in sports analytics, fintech, or gaming.
- Expertise in reinforcement learning, predictive modeling, and generative AI.
- Familiarity with blockchain ecosystems and decentralized architectures.
- Visionary mindset with ability to translate complex AI concepts into scalable, user-centric solutions.

We Offer

- €12,000/month in GAINR tokens + 2.5–5.0% equity as per our [Compensation Policy](#)
- Opportunity to shape the future of AI in Web3 iGaming.
- Work alongside a world-class team of engineers, quants, and industry veterans.
- Flexible remote work environment with global team collaboration.

About Gainr Analytics

Gainr Analytics is a sports prediction markets analytics start-up that develops AI based proprietary sports betting models, bots and agents to provide, uncorrelated, robust ROI opportunities for operators, syndicates and investors.
