The Mission
Launch Your Own Sports Betting Syndicate
Powered by Gainr's Syndicate-as-a-Service Platform

You've built an edge. Now turn it into a business.

Gainr is looking for profitable sports betting analysts, model developers, and market specialists who want to launch and operate their own betting syndicate using our **Syndicate-as-a-Service (SaaS)** platform.

Most talented bettors are held back by the same challenges:

- Raising capital
- Managing investors
- Maintaining transparent performance records
- Executing bets consistently at scale
- Building operational infrastructure
- Establishing credibility with potential backers

Gainr solves these problems.

Our platform allows analysts to focus on what they do best:

Finding value and beating the market.

We'll help with everything else.

What Is Gainr?

Gainr is a technology platform that enables sports betting professionals to create, manage, and scale investment-style betting syndicates.

Think of it as the operating system for professional betting funds.

Through our platform, analysts can:

- Launch their own syndicate
- Build a verified track record
- Attract capital from investors
- Automate trade execution
- Manage portfolio performance
- Grow assets under management
- Operate professionally without building the infrastructure themselves

Who We're Looking For

You may be:

- A profitable sports bettor
- A quantitative modeller
- A specialist in niche markets
- A sports trader
- A betting syndicate operator
- A data scientist with predictive models
- An expert in a specific sport or league

We're interested in genuine, repeatable betting edges.

Whether you're betting Premier League football, South American basketball, lower-league tennis, esports, horse racing, or highly specialised niche markets, we'd like to hear from you.

What You Bring

- A demonstrable edge
- Strong market knowledge
- A disciplined betting methodology
- Performance data where available
- Ambition to grow beyond managing your own bankroll

What Gainr Provides

Automated Trade Execution

Submit selections and let the platform handle execution workflows, monitoring, and reporting.

Verified Performance Tracking

Build a transparent, independently verifiable record of your performance, returns, and risk metrics on the blockchain.

Investor Management

Gainr handles the administrative complexity of working with investors, allowing you to focus on generating returns rather than managing spreadsheets and communications.

Syndicate Infrastructure

Launch your own branded syndicate without needing developers, operations staff, or expensive custom software.

Capital Formation

As your track record grows, you gain the opportunity to attract additional investor capital through the platform.

Scalability

Transition from managing a personal betting bank to operating a professional, investment-style betting strategy.

Compensation

This is not a salaried role.

Instead, analysts operate as independent syndicate managers and participate in the economic upside generated by their strategy via a generous revenue sharing arrangement. The better your strategy performs, the greater your earning potential.

Why Analysts Join Gainr

Building a profitable betting model is difficult.

Building a profitable betting business is even harder.

Gainr allows talented analysts to skip years of infrastructure development and launch with a professional-grade platform from day one.

You retain your independence.

You retain your intellectual property.

You build your own track record.

You grow your own syndicate.

Gainr provides the infrastructure, automation, verification, and investor ecosystem to help you scale.

Step 1: Read our FAQs on our Discord Server at https://discord.gg/BxJfvwcmdh

Step 2: DM your email address to our Discord community manager Frank and we will generate you an access link to the Gainr beta platform.

Step 3: Build your track record. Scale your edge.
